General marking principles for Higher Administration and IT

Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) For **compare** questions, candidates must demonstrate knowledge and understanding of the similarities and/or differences between things, features, methods or choices. This does not need to be a comparative sentence. Up to the total mark allocation for this question:
 - award **1 mark** for each accurate point of comparison.
- (d) For **discuss** questions, candidates must make accurate relevant points that are more than just naming. There has to be an element of discussion within each point. Award marks for development and examples of a point.
 - award **1 mark** for each discussion point.
 - award **1 mark** for further development of a relevant point, including exemplification when appropriate.
- (e) For **describe** questions, candidates must make a number of relevant factual points, which may be characteristics and/or features, as appropriate to the question asked. These points may relate to a concept, process or situation. Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these. Up to the total mark allocation for this question
 - award **1 mark** for each relevant factual point
 - award **1 mark** for any further development of a relevant point, including exemplification when appropriate.
- (f) For **outline** questions, candidates must make a number of brief statements appropriate to the question asked. These may include facts, features or characteristics. Up to the total mark allocation for this question
 - award **1 mark** for each accurate statement.
- (g) For **justify** questions, candidates must give good reasons to support suggestions or explain the reason(s) for or against the issue raised in the question. A development point can be given.
 - award **1 mark** for further development of an accurate justification.
